

Human Connectome Project

February 5, 2018

Dear

We cordially invite you to attend the 2019 Human Connectome Project Course: Exploring the Connectome (HCP Course 2019, <http://humanconnectome.org/course-registration/2019/exploring-the-human-connectome.php>), which will be held July 8-12, 2019 at the University Place Hotel and Conference Center at Portland State University in Portland, Oregon, USA.

The purpose of the Human Connectome Project (HCP) is to advance the understanding of anatomical and functional organization in the healthy human brain across the lifespan. The HCP is using cutting-edge neuroimaging to map brain connections in healthy adults, children, and older adults and sharing all data, processing methods, and analysis tools with the scientific community. The 2019 Human Connectome Project Course is bringing together scientists of various backgrounds who are engaged in investigations relevant to human brain organization for an intensive educational course on the data and methods being developed by the HCP for studying human brain connectivity.

This invitation does not include any financial support for travel, registration fees or local expenses relative to the HCP 2019 Course.

Please feel free to inform us if you have any questions and/or additional requests.

We look forward to seeing you in Portland!

Sincerely,

Jennifer Elam, Ph.D.
HCP Outreach Director
